Volume 146 1985

Table of Contents

No. 1 1–236 issued on January 2, 1985
No. 2 237–482 issued on January 15, 1985
No. 3 483–714 issued on February 1, 1985

Acknowledgement to Referees 1– 4

Newsletter 1985 of the Nomenclature Committee of IUB (NC-IUB) and the IUPAC-IUB Joint Commission on Biochemical Nomenclature 237–239

Corrections 713

Nucleic acids, protein synthesis, and molecular genetics

Cloning and sequence analysis of human genomic DNA encoding γ subunit precursor of muscle acetylcholine receptor
S. Shibahara, T. Kubo, H. J. Perski, H. Takahashi, M. Noda and S. Numa 15– 22

The core proteins of 35S hnRNP complexes. Characterization of nine different species
H.-E. Wilk, H. Werr, D. Friedrich, H. H. Kiltz and K. P. Schäfer 71– 81

Effects of the ribosomal subunit association on the chemical modification of the 16S and 23S RNAs from *Escherichia coli*
N. Meier and R. Wagner 83– 87

Sheep keratins: characterization of cDNA clones for the glycine + tyrosine-rich wool proteins using a synthetic probe
E. Kuczek and G. E. Rogers 89– 93

Regulation of the activity of eukaryotic peptide elongation factor 1 by autocatalytic phosphorylation
Z. Tuháčková, J. Ullrichová and J. Hradec 161–166

DNA regions associated with the nuclear matrix of Ehrlich ascites cells expose single-stranded sites after deproteinization
H. Probst and R. Herzog 167–171

Expression in mammalian cells of the diaminopimelic acid decarboxylase of *Escherichia coli* permits cell growth in lysine-free medium
J. Jouanneau, P. Stragier, J. Bouvier, J.-C. Patte and M. Yaniv 173–178

Isolation and characterization of the Fnr protein, the transcriptional regulator of anaerobic electron transport in *Escherichia coli*
G. Unden and J. R. Guest 193–199

Inhibition of the aminoacylation of selected tRNA molecules by an estrogen-regulated factor on uterine ribosomes. Regulation of aminoacylation of tRNA by estrogens
S. M. Whelly and K. L. Barker 245–253

Sequential ADP-ribosylation pattern of nucleosomal histones. ADP-ribosylation of nucleosomal histones
A. Huletsky, C. Niedergang, A. Fréchette, R. Aubin, A. Gaudreau and G. G. Poirier 277–285

Stimulation of peptidyltransferase reactions by a soluble protein
M. C. Ganoza, N. Zahid and R. M. Baxter 287–294

The role of cholesteryl 14-methyl-hexadecanoate in the function of eukaryotic peptide elongation factor 1
Z. Tuháčková and J. Hradec 365–370

Nucleotide sequence of yeast gene *CPA1* encoding the small subunit of arginine-pathway carbamoyl-phosphate synthetase. Homology of the deduced amino acid sequence to other glutamine amidotransferases
M. Werner, A. Feller and A. Piérard 371–381

Purification of RNA polymerase and transcription-termination factor Rho from *Erwinia carotovora*
D. O. Nwankwo and S. K. Guterman 383–389

Synthesis and intracellular transport of lectin and storage protein precursors in endosperm from castor bean
J. M. Lord 403–409

Precursors of ricin and *Ricinus communis* agglutinin. Glycosylation and processing during synthesis and intracellular transport
J. M. Lord 411–416

Strain-dependent variation in ribosomal DNA arrangement in *Absidia glauca*
J. Wöstemeyer 443–448

Characterisation of a *Dictyostelium discoideum* DNA fragment coding for a putative $tRNA^{Val}_{GUU}$ gene. Evidence for a single transcription unit consisting of two overlapping class III genes
T. Dingermann, W. Bertling, F. Pistel and E. Amon 449–458

A type-II DNA topoisomerase and a catenating protein from the transplantable VX2 carcinoma
G. F. Riou, M. Gabillot, M. Barrois, F. Breitburd and G. Orth 483–488

Deinduction of transcription of *Xenopus* 74-kDa albumin genes and destabilization of mRNA by estrogen *in vivo* and in hepatocyte cultures
A. P. Wolffe, J. F. Glover, S. C. Martin, M. P. R. Tenniswood, J. L. Williams and J. R. Tata 489–496

Cloning and characterization of the *pyrE* gene and of *PyrE*:: Mud1 (Ap® *lac*) fusions from *Salmonella typhimurium*
J. Neuhard, E. Stauning and R. A. Kelln 597–603

Induction of size reduction in *Escherichia coli* by near-ultraviolet light
A. Caldeira de Araujo and A. Favre 605–610

Regulation of ppp(A2'p)$_n$A-dependent RNase levels during interferon treatment and cell differentiation
D. Krause, R. H. Silverman, H. Jacobsen, S. A. Leisy, C. W. Dieffenbach and R. M. Friedman 611–618

A cytosol protease from the estrogen-resistant C3H mammary carcinoma increases the affinity of the estrogen receptor for DNA *in vitro*
P. P. Baskevitch and H. Rochefort 671–678

Specific fragmentation of tRNA and rRNA at a 7-methylguanine residue in the presence of methylated carrier RNA
V. S. Zueva, A. S. Mankin, A. A. Bogdanov and L. A. Baratova 679–687

Protein chemistry and structure

Conformational changes in actin resulting from Ca^{2+}/Mg^{2+} exchange as detected by proton NMR spectroscopy
J. A. Barden and C. G. dos Remedios 5– 8

Purification and characterization of the indole-3-glycerolphosphate synthase/anthranilate synthase complex of *Saccharomyces cerevisiae*
F. Prantl, A. Strasser, M. Aebi, R. Furter, P. Niederberger, K. Kirschner and R. Huetter 95–100

The $NADP^+$-binding site of ferredoxin-$NADP^+$ reductase. Sequence of the peptide containing the essential lysine residue
D. Cidaria, P. A. Biondi, G. Zanetti and S. Ronchi 295–299

Further characterization of the structural and functional properties of the cross-linked complex between F-actin and myosin S-1
J.-F. Rouayrenc, R. Bertrand, R. Kassab, D. Walzthöny, M. Bähler and T. Wallimann 391–401

The importance of quantitative Mössbauer spectroscopy of MoFe-protein from *Azotobacter vinelandii*
W. R. Dunham, W. R. Hagen, A. Braaksma, H. J. Grande and H. Haaker 497–501

Facile identification of protein sequences by mass spectrometry. B subunit of *Vibrio cholerae* classical biotype Inaba 569B toxin
T. Takao, H. Watanabe and Y. Shimonishi 503–508

An oxygenation-linked dye binding to *Limulus polyphemus* hemocyanin
N. Makino 563–569

Elution of fibronectin proteolytic fragments from a hydroxyapatite chromatography column.
A simple procedure for the purification of fibronectin domains
L. Zardi, B. Carnemolla, E. Balza, L. Borsi, P. Castellani, M. Rocco and A. Siri 571–579

Specific labeling of cytosolic and mitochondrial aspartate aminotransferases
D. Carotti, F. Andria, A. Giartosio, C. Turano and F. Riva 619–623

A crystalline synthetic peptide representing the epitope of a monoclonal antibody raised against synthetic interferon-*a*1 fragment 111–166
M. Aguet, P. Salgam, B. Gutte and H. Arnheiter 689–691

Enzymology

Resolution by high-pressure liquid chromatography and partial characterization of multiple forms of cytochrome P-450 from hepatic microsomes of phenobarbital-treated rats
S. K. Bansal, J. H. Love and H. L. Gurtoo 23– 33

Mechanisms of activation and secretion of a cell-associated precursor of an exocellular protease of *Pseudomonas aeruginosa* 34362A
I. T. Fecycz and J. N. Campbell 35– 42

Kinetic studies on surface-mediated activation of bovine factor XII and prekallikrein. Effects of kaolin and high-*M*, kininogen on the activation reactions
T. Sugo, H. Kato, S. Iwanaga, K. Takada and S. Sakakibara 43– 50

4-Aminobutyrate: 2-oxoglutarate aminotransferase of *Streptomyces griseus:* Purification and properties
K. Yonaha, K. Suzuki and S. Toyama 101–106

Dual function of calmodulin (δ) in phosphorylase kinase
Z. Hessová, M. Varsányi and L. M. G. Heilmeyer, Jr 107–115

Effect of the filamentous structure of myosin on the actomyosin ATPase activity
J.-J. Bechet and A. d'Albis 117–123

Kinetics of activation of L-lactate dehydrogenase from *Streptococcus lactis* by fructose 1,6-bisphosphate
M. J. Hardman, V. L. Crow, D. S. Cruickshank and G. G. Pritchard 179–183

Time course of polynucleosome relaxation and ADP-ribosylation. Correlation between relaxation and histone H1 hyper-ADP-ribosylation
C. P. Niedergang, G. de Murcia, M.-E. Ittel, J. Pouyet and P. Mandel 185–191

Tryptophanamide formation by *Escherichia coli* tryptophanyl-tRNA synthetase
D. Andrews, V. Trezeguet, M. Merle, P.-V. Graves, K. H. Muench and B. Labouesse 201–209

The cellulase of *Trichoderma viride*. Purification, characterization and comparison of all detectable endoglucanases, exoglucanases and β-glucosidases
G. Beldman, M. F. Searle-van Leeuwen, F. M. Rombouts and F. G. J. Voragen 301–308

Affinity labeling of rabbit muscle fructose-1,6-bisphosphate aldolase with 5'-[*p*-(fluorosulfonyl)benzoyl]-1,N^6-ethenoadenosine
K. Palczewski, P. A. Hargrave, E. J. Folta and M. Kochman 309–314

Characterization of human glucosylsphingosine glucosyl hydrolase and comparison with glucosylceramidase
A. M. Vaccaro, M. Muscillo and K. Suzuki 315–321

Interaction of the pneumococcal amidase with lipoteichoic acid and choline
T. Briese and R. Hakenbeck 417–427

Purification and characterization of two aminopeptidases from guinea-pig small-intestinal mucosa. Cavian intestinal tripeptide hydrolases
J. G. Morgan and J. Donlon 429–435

Isolation and characterization of an iron-containing superoxide dismutase from tomato leaves, *Lycopersicon esculentum*
J. Kwiatowski, A. Safianowska and Z. Kaniuga 459–466

Reduced 6,6,8-Trimethylpterins. Preparation, properties and enzymic reactivities with dihydropteridine reductase, phenylalanine hydroxylase and tyrosine hydroxylase
D. Randles and W. L. F. Armarego 467–474

The catalytic activity of nitrogenase in intact *Azotobacter vinelandii* cells
J. Klugkist, H. Haaker, H. Wassink and C. Veeger 509–515

Enzymes in polyelectrolyte complexes. The effect of phase transition on thermal stability
A. L. Margolin, S. F. Sherstyuk, V. A. Izumrudov, A. B. Zezin and V. A. Kabanov 625–632

Metal binding to yeast aminopeptidase I
K.-H. Röhm 633–639

Monoclonal antibodies against species-specific cephalosporinase of *Pseudomonas aeruginosa*
K. Murakami and T. Yoshida 693–697

Insulin-induced increases in the activity of the spontaneously active and ATP · Mg-dependent forms of phosphatase-1 in alloxan-diabetic rat liver
C. J. Dragland-Meserve, D. K. Webster and L. H. Parker Botelho 699–704

Carbohydrates, lipids and other natural products

Glycosphingolipids in insects. Chemical structures of ceramide monosaccharide, disaccharide, and trisaccharide from pupae of *Calliphora vicina* (Insecta: Diptera)
R. D. Dennis, R. Geyer, H. Egge, H. Menges, S. Stirm and H. Wiegandt 51– 58

Direct evidence by carbon-13 NMR spectroscopy for the *erythro* configuration of the sphingoid moiety in Gaucher cerebroside and other natural sphingolipids
F. Sarmientos, G. Schwarzmann and K. Sandhoff 59– 64

Structure determination of oligosaccharides isolated from Cad erythrocyte membranes by permethylation analysis and 500-MHz ^{1}H-NMR spectroscopy
F. Herkt, J. P. Parente, Y. Leroy, B. Fournet, D. Blanchard, J.-P. Cartron, H. van Halbeek and J. F. G. Vliegenthart 125–129

Ether glycerolipids: novel substrates for studying specificity of enzymes involved in glycerolipid biosynthesis in higher plants
N. Weber and H. Benning 323–329

Characterization of a novel linkage unit between ribitol teichoic acid and peptidoglycan in *Listeria monocytogenes* cell walls
S. Kaya, Y. Araki and E. Ito 517–522

The major oligosaccharides in the large subunit of the hemagglutinin from fowl plague virus, strain Dutch. Structure elucidation by one-dimensional and two-dimensional ^{1}H nuclear magnetic resonance and by methylation analysis
H. Niemann, J. Dabrowski, U. Dabrowski, R. Geyer, W. Keil, H.-D. Klenk and S. Stirm 523–532

Citrobacter lipopolysaccharide: structure elucidation of the O-specific polysaccharide from strain PCM 1487 by mass spectrometry, one-dimensional and two-dimensional ^{1}H-NMR spectroscopy and methylation analysis
A. Gamian, E. Romanowska, A. Romanowska, C. Ługowski, J. Dabrowski and K. Trauner 641–647

Physical biochemistry

^{1}H and ^{15}N NMR investigation of the interaction of pyrimidine nucleotides with ribonuclease A
U. Hahn, R. Desai-Hahn and H. Rüterjans 705–712

Membranes and bioenergetics

The effects of terbium(III) on the Ca-activated, K channel found in the resealed human erythrocyte membrane
P. G. Wood and H. Mueller 65– 69

Fusion of erythrocyte ghosts induced by calcium phosphate. Kinetic characteristics and the role of Ca^{2+}, phosphate and calcium-phosphate complexes
D. Hoekstra, J. Wilschut and G. Scherphof 131–140

A pantothenate derivative is covalently bound to mitochondrial proteins in *Neurospora crassa*
P. L. Lakin-Thomas and S. Brody 141–147

Structure of the cytochrome *c* oxidase complex of rat liver. 1. Studies on nearest-neighbour relationship of polypeptides with cross-linking reagents
J. Jarausch and B. Kadenbach 211–217

Structure of the cytochrome *c* oxidase complex of rat liver. 2. Topological orientation of polypeptides in the membrane as studied by proteolytic digestion and immunoblotting
J. Jarausch and B. Kadenbach 219–225

Modulation of membrane fluidity in living protoplasts of *Nicotiana plumbaginifolia* by catalytic hydrogenation
L. Vigh, F. Joó and Á. Cséplő 241–244

Lipid requirement of the vanadate effect on the binding of calcium and ATP to the calcium transport ATPase of the sarcoplasmic reticulum
P. Medda and W. Hasselbach 255–260

The activation of adenylate cyclase from small intestinal epithelium by cholera toxin
P. Domínguez, F. Barros and P. S. Lazo 533–538

Receptor-mediated endocytosis of polymeric IgA and galactosylated serum albumin in rat liver. Evidence for intracellular ligand sorting and identification of distinct endosomal compartments
J. N. Limet, J. Quintart, Y.-J. Schneider and P. J. Courtoy 539–548

Partial purification and characterization of an anion-activated ATPase from radish microsomes
L. Tognoli 581–588

Differences in chlorophyll-protein complexes and composition of polypeptides between thylakoids from bundle sheaths and mesophyll cells in maize
R. Bassi, A. dal Belin Peruffo, R. Barbato and R. Ghisi 589–595

Sugar specificity and sugar-proton interaction for the hexose-proton-symport system of *Chlorella*
E. Komor, C. Schobert and B.-H. Cho 649–656

Cellular biochemistry and metabolism

N-Bromoacetyl-amino-cyanopindolol: a highly potent beta-adrenergic affinity label blocks irreversibly a non-protein component tightly associated with the receptor
M. Chorev, A. Feigenbaum, A. K. Keenan, C. Gilon and A. Levitzki 9–14

Formation of carbon monoxide from CO_2 and H_2 by *Methanobacterium thermoautotrophicum*
B. Eikmanns, G. Fuchs and R. K. Thauer 149–154

Synthesis and secretion of hemopexin in primary cultures of rat hepatocytes. Demonstration of an intracellular precursor of hemopexin
N. R. Katz, V. Goldfarb, H. Liem and U. Muller-Eberhard 155–159

Collagen-stimulating factor from embryonic brain has ascorbate-like activity and stimulates prolyl hydroxylation in cultured muscle cells
C. Kalcheim, D. Duksin, E. Bachar and Z. Vogel 227–232

Immunochemical measurement of histone H3 in non-nucleosomal compartments of cultured mammalian cells
T. Senshu, K. Akiyama, T. Ohsawa and K. Takahashi 261–266

Human plasma actin-depolymerizing factor. Purification, biological activity and localization in leukocytes and platelets
C. Chaponnier, P. Patebex and G. Gabbiani 267–276

A calcium-dependent protease associated with the neural cytoskeleton. Purification and partial characterisation
Y. Ishizaki, M. Kurokawa and K. Takahashi 331–337

Direct assessment of β-adrenergic receptors in intact rat adipocytes by binding of [^{3}H]CGP 12177. Evidence for agonist high-affinity binding complex and for β_1 and β_2 receptor subtypes
D. Lacasa, B. Agli and Y. Giudicelli 339–346

Biosynthesis and secretion of α_1 acute-phase globulin in primary cultures of rat hepatocytes
J. Bauer, A. Kurdowska, T.-A. Tran-Thi, W. Budek, A. Koj, K. Decker and P. C. Heinrich 347–352

Rat α_1-microglobulin. Purification from urine and synthesis by hepatocyte monolayers
B. Åkerström and B. Landin 353–358

Decrease of fatty acid oxidation, ketogenesis and gluconeogenesis in isolated perfused rat liver by phenylalkyl oxirane carboxylate (B 807-27) due to inhibition of CPT I (EC 2.3.1.21)
H. P. O. Wolf and D. W. Engel 359–363

Effects of denaturation and methylation on the degradation of proteins in cultured hepatoma cells and in reticulocyte cell-free systems
R. Katznelson and R. G. Kulka 437–442

Dexamethasone restores hormonal inducibility of ornithine decarboxylase in primary cultures of rat hepatocytes
W. A. Schulz, R. Gebhardt and D. Mecke 549–553

Glucose repression and hexokinase isoenzymes in yeast. Isolation and characterization of a modified hexokinase PII isoenzyme
E. Kopetzki and K.-D. Entian 657–662

Mitochondrial and peroxisomal metabolism of glutaryl-CoA
J. Vamecq, E. de Hoffmann and F. Van Hoof 663–669

Developmental biochemistry and immunology

Perinatal development of the liver in rat and spiny mouse. Its relation to altricial and precocial timing of birth
W. H. Lamers, P. G. Mooren, A. De Graaf and R. Charles 475–480

Immunochemical and autoantigenic properties of the globular domain of basement membrane collagen (type IV)
H. von der Mark, I. Oberbäumer, R. Timpl, R. Kemler and G. Wick 555–562

Correspondence

Comments on: Alterations of oxidative-phosphorylation reactions in mitochondria isolated from hypothyroid-rat liver, by I. Ezawa et al.
S. B. Shears

Reply to the comments
I. Ezawa and E. Ogata 233–235

Comments on 'Chemical modification of hydroxynitrile lyase by selective reaction of an essential cysteine-SH group with α,β-unsaturated propriophenones as pseudo-substrates' by L. Jaenicke and J. Preun
M. S. Jorns

Reply to the comments
L. Jaenicke and J. Preun 481–482
